DOCKET FILE COPY ORIGINAL

Subject: Use of Cell Phones on Aircraft-Docket #04-435.
See Attached Cartoon

Dear Ms Dortch,

The attached cartoon sums up what passengers on commercial aircraft will be faced with if the use of cell phones on aircraft is approved.

People using cell phones are everywhere-- in restaurants, in their cars, on the sidewalks, inside offices and buildings, in malls and theaters and in doctors' offices to name a few--- and almost all of them are talking in loud voices that can be heard all over!!!

For those of us who don't use cell phones, there is no-where we can go to escape this wide=spread annoyance except in our own homes or on a flight on a commerical aircraft.

Now we understand that the FCC is considering taking away that on last "bastion of tranquility" from us.

WE BEG OF YOU !!! Don't approve the use of cell phones on aircraft! If a cell phone user has to make a very important call, he can do ^{it} in the airport before he boards the flight.

PLEASE! PLEASE! PLEASE!! Don't approve the use of cell phones on aircraft!!

Sincerely,

WB Crispen
